

Hardyhook

Unbreakable plastic coat hooks

Hardyhooks are unbreakable plastic coat hooks. They are an affordable, attractive way to make your cloakroom, changing room or work place smarter and safer.

Use **Hardyhooks** in place of metal hooks to significantly reduce the risk of eye and shoulder injuries from protruding metal hooks.

SAFER - When brittle metal hooks become broken or deliberately vandalised they become even more dangerous, thanks to jagged and sharp edges; **Hardyhooks** are unbreakable plastic coat hooks.

STRONGER - made from sturdy yet flexible industrial Nylon. The hook supports up to 15kg safely whilst having just enough flex to ensure it never snaps.
